

# NEW GENERATION ROTARY SCREW COMPRESSORS - FM SERIES

## At a glance...

-  **Nominal Pressure**  
5 - 13 bar g
-  **Motor Power**  
7 - 22kW
-  **Volume Flow**  
0.45 - 3.50 m<sup>3</sup>/min

## FM & FM RS Screw Compressors up to 46°C ambient temperature

The generously sized ventilation system ensures optimum cooling, low outlet air temperatures best performance and reliability under harshest conditions

### Premium Quality Airends

FM series feature high quality airends manufactured in Finland using state of the art manufacturing techniques. The airends are designed with focus on reliability and efficiency. The rotors are accurate and thoroughly checked and measured by a computerised control system. Enduro airends have a flat specific power consumption curve, which enables efficient use of the airend in wide rpm. For models FM15-22 the Tamrotor Enduro airend features integrated air - oil separator and oil filter which offers a very compact design and improved maintenance.

### FM & FM RS package compressors with dryer and tank

Based up on the individual customer requirements the compressors can be combined with different options to provide options from a stand alone compressor to the complete package.

- Compressor base mounted
- Tank mounted compressor
- Complete package including compressor, dryer and tank

### New advanced controller C-PRO 2.0 ensures reliable operation and protects your investment by continuously monitoring the operational parameters

- ✓ 3 analog inputs
- ✓ Multi-language: English/German/French/Italian/Spanish
- ✓ Standard sequence control up to 8 units (up to 7 units fixed speed & 1 variable speed)
- ✓ Standard Modbus
- ✓ 15 failure records in memory
- ✓ Continuous system monitoring

# van Elewout Kompressoren

## Easy maintenance

FM compressors are designed to ensure easy access to maintenance points. Panels on the structure can be easily removed to allow full access to all service points. Also, the limited number of moving parts reduces service costs.

The automate tensioning of the belt assures long life of the belt, less maintenance and noise reduction.

Belt Auto Tensioning system

Compact design with a footprint of 0,4 m<sup>2</sup> for frame 1 and 0.5m<sup>2</sup> for frame 2; FM series offer one of the most compact air compressors in the market. FM innovative design also features low noise level allowing installation at the point of use.

## High Efficient Motors

- ✓ International efficiency class 2 (IE3) as a standard.
- ✓ IP 55 enclosure
- ✓ Full performance up to 46°C ambient temperature

# FM RS

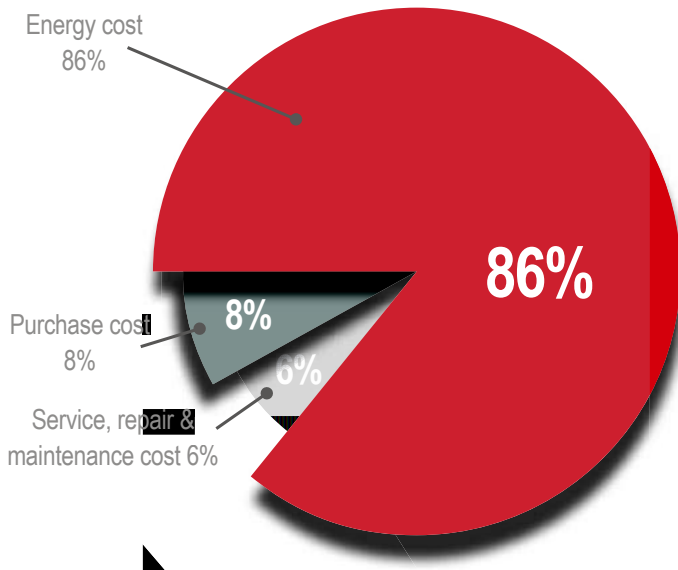

= Energy savings and lower CO<sub>2</sub> emissions into the environment.

## The variable speed compressor: One smart solution

Variable speed compressors can efficiently and reliably handle the varying air demand found in most plant air systems. These compressors speed up and slow down to match air supply to air demand as it fluctuates. The right variable speed compressor in the right application delivers significant energy savings and a stable, consistent air supply.

## Cost of compressed air over 5 years

Allows substantial energy savings of at least 25% of the energy cost

## The intelligent C-PRO 2.0 controller

### Simplicity

The C-PRO 2.0 controller was designed to make the operators' interface with the variable speed drive transparent. This new generation controller features extra functions for variable speed compressors like drive status display and flexible PID setting according the application. You don't need to be an expert on variable speed drives to operate your compressor. The controller takes care of the details and automatically adjusts the compressor performance to meet your changing air system demands - saving you energy. Changing the discharge pressure is as easy as pressing a button.

## FM package compressors

### With dryer, filters and tank

The FM Package compressors can be easily and rapidly installed in any installation.

Service Kit for every 4000 h or 12 months	<b>CC1180685</b>
Service Kit for every 8000 h or 24 months	<b>CC1180689</b>
ChampLube Lubricant 3 x 4 Litres	<b>CC1180019</b>

<sup>1)</sup> Compressor mounted on tank with refrigeration cycle dryer (CT).  
Dew point + 3° C with compressor air inlet temperature + 35° and per ISO 7183

<sup>2)</sup> Kit includes PRE FILTER, COALESCENT FILTER and BY-PASS

<sup>3)</sup> Must be clearly mentioned in the order

## FM 22 Series: Screw Compressors

**Design:** Oil flooded, Single stage rotary screw compressor, belt drive, air cooled

**Pressure Range:** 7 to 13 bar

**Electric motor:** 22 kW - IE3

FM SERIES CODE	TYPE	FM22			
		CC1184269	CC1184270	CC1184169	CC1184271
Maximum pressure	bar	7	8	10	13
Capacity at maximum pressure	m <sup>3</sup> /min	3.50	3.23	3.06	2.59
Drive motor IP 55 / class F – IE3	kW	22	22	22	22
Operating Voltage, 50Hz	400 V	•	•	•	•
Control voltage	24 V	•	•	•	•
C-Pro 2.0 electronic controller		•	•	•	•
Noise Level	db(A)	74	74	74	74
After-cooler		•	•	•	•
Weight	kg	367	367	367	367
Dimensions [L x W x H]	mm	787 x 698 x 1202	787 x 698 x 1202	787 x 698 x 1202	787 x 698 x 1202
Outlet connection EN 10266 (DIN 2999)		1"	1"	1"	1"

COMPRESSOR MOUNTED ON 500 LT TANK					
Code		CC1186484	CC1186485	CC1186486	CC1186487
